

Algebra II Second Quarter Extra Credit

My percentages on the assessments were:

Chapter 6 Test: _____ 9.1-9.3 Quiz: _____ 9.4-9.6 Quiz: _____

Radicals Test: _____

Therefore, my lowest grade was on _____.

For my extra credit I will do the following for each quiz question I got wrong:

- a) Copy each problem I got wrong on the assessment onto my extra credit assignment.
- b) Find one example from my notes or study guide that is like each problem and copy down the problem and work as it is in the notes/study guide. (Use the online copies of the notes)
- c) Re-do all the problems correctly showing all my work.
- d) Find all the homework problems like each problem and write down 3 numbers: how many there are, how many I got wrong, and how many I corrected (not how many were originally correct, how many I got wrong and afterwards re-worked to make corrections).

I will turn this in no later than Friday, January 20, 2017.

Staple this sheet on top, then the corrections, then the original assessment on the bottom.
